Results and Achievements

The most renowned and leading position in the production of portable, ready chapels and churches

The chapels and churches created by “Naodomiki” are examples of high quality and established Orthodox style. They are in perfect harmony with traditional Byzantine architecture and the possibilities of contemporary functionality.

For many years this type of construction has been set up throughout Greece, Bulgaria, Russia, Ukraine, Romania, Cyprus and for Orthodox communities in Europe.

Advantages and Solutions:

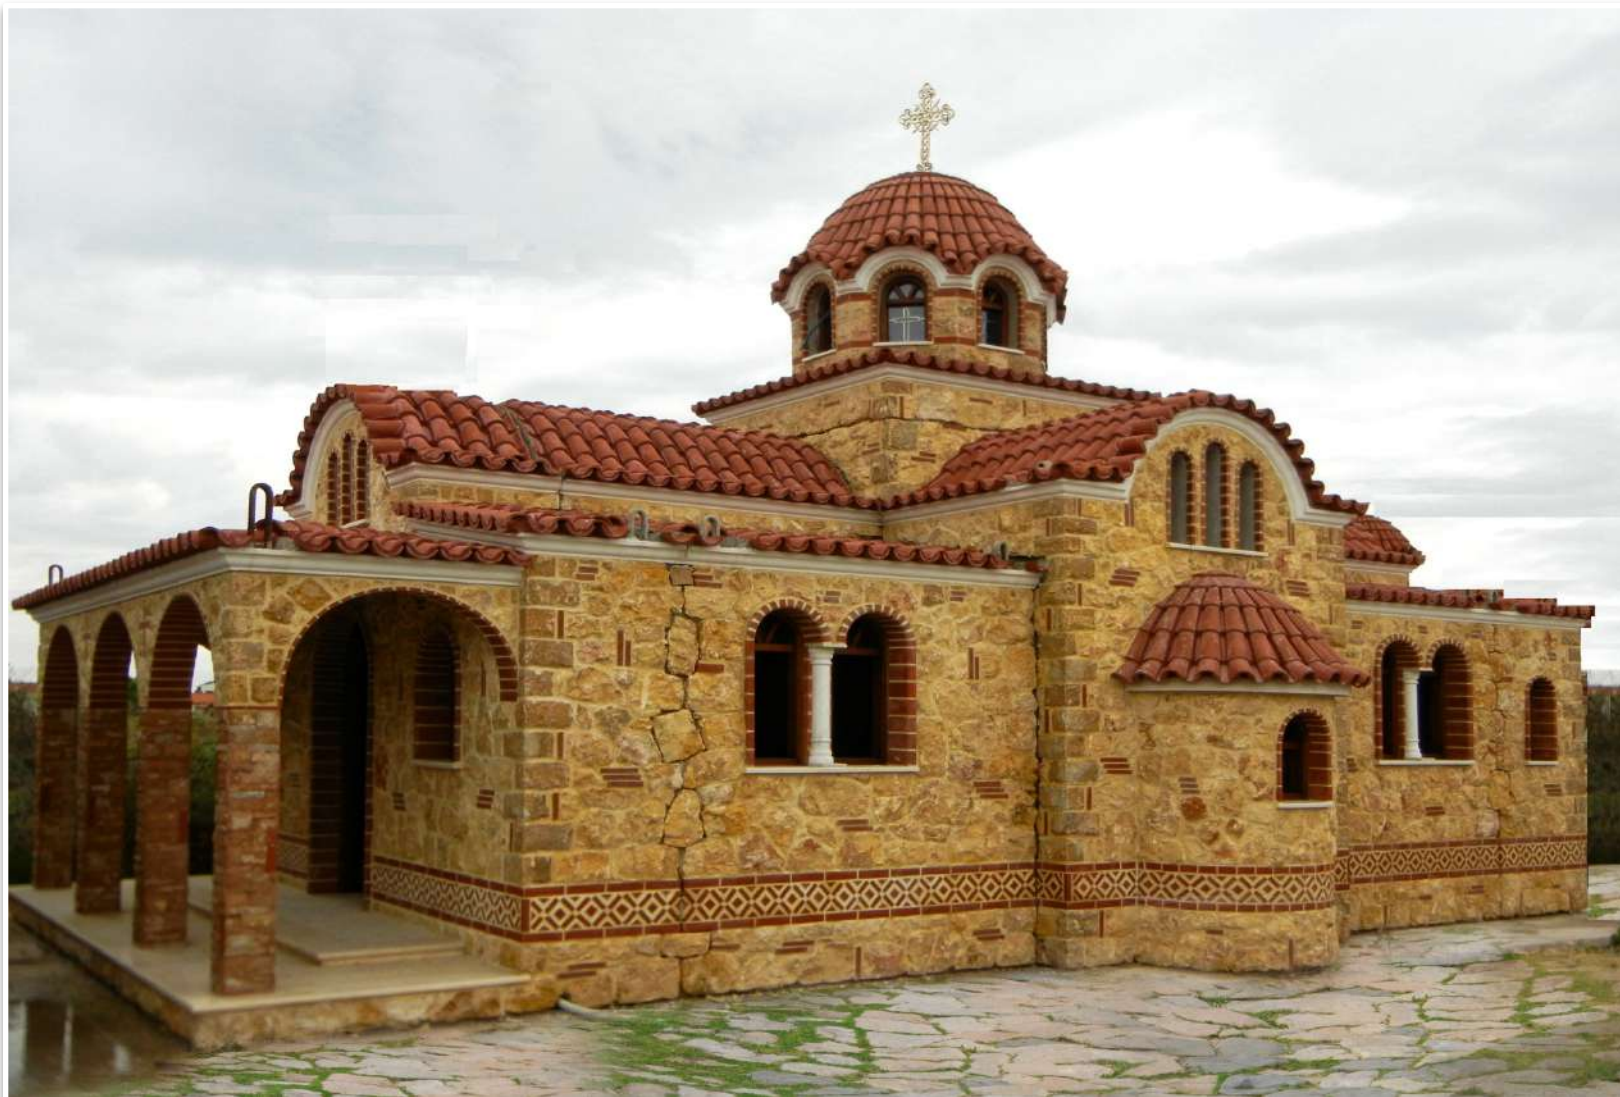

- Without any construction activities on site - you have a ready solution.
- Short term
- Small investment
- Easy legalization
- Exceptional strength of the reinforced concrete structure
- Choice of a wide variety of individual solutions

We are distinguished by:

- Quantity and quality of reinforcement and concrete
- Highest quality of materials such as insulation, resins, plasters
- Various handmade stones, real tiles, massive crosses and bronze bells, slate tiles, window frames, colored church glass
- The patterns have a smaller narthex that does not take away from the base area

Ready module church - "Cross Crown"

* Model example
